

THE COUNCIL FOR TOBACCO RESEARCH-U.S.A., INC.

SUPPORTING BIOMEDICAL INVESTIGATION

900 THIRD AVENUE  
NEW YORK, NY 10022  
(212) 421-8885

JAMES F. GLENN, M.D.  
CHAIRMAN AND PRESIDENT  
CHIEF EXECUTIVE OFFICER

MEMORANDUM TO: Board of Directors, Council For Tobacco Research,  
U.S.A., Inc.

FROM: James F. Glenn, M.D., Chairman

SUBJECT: New York Academy of Sciences Meeting

DATE: March 15, 1994

I enclose a copy of the program for the forthcoming NYAS meeting on "Functional Diversity of Interacting Receptors," which will be held in Washington, D.C. May 25-28.

As you will see on page 4, The Council For Tobacco Research U.S.A., Inc. is recognized as providing the major funding. We are joined by some very distinguished corporations as additional contributors.

The program is outstanding and has already received widespread attention. Seven of the speakers are current or former grantees of CTR. In addition, there are four other speakers who have had indirect support from us through collaboration with other individuals who held CTR grants.

Most members of our scientific staff here at CTR will attend the meeting and they are being offered gratis registration as a courtesy to us, acknowledging your generosity in supporting this event.
